SECTION 1. GENERAL

A. Statement of Findings

The County Legislature of Clinton County finds that:

- a. Removal of certain materials from the solid waste stream will decrease the flow of solid waste to County landfills, aid in the conservation of valuable resources, and reduce the required capacity of existing and proposed Solid Waste disposal facilities.
- b. The New York State Solid Waste Management Act of 1988 requires all municipalities to adopt a local law or ordinance by September 1, 1992, requiring the Solid Waste which has been left for collection or which is delivered by the generator of such waste to a Solid Waste Management Facility, shall be separated into recyclable, reusable or other components for which economic markets for alternate uses exist.
- c. Methods of Solid Waste management emphasizing source reduction, recovery, conservation, and recycling of Solid Wastes are significant to the long-range preservation of the health, safety, and well-being of the public, to the economic productivity and environmental quality of Clinton County, and to the conservation of resources.

To minimize the threat to human health and safety posed by the effects of landfill disposal on groundwater quality; and to insure the long-range preservation of the health, safety, and well-being of the public, and the economic productivity and environmental quality of Clinton County by conserving resources and reducing the potential for pollution of the environment.
- c. To identify methods of collection, reduction, and separation which will encourage the more efficient utilization of Solid Waste disposal facilities and contribute to more effective programs for the reuse of Solid Wastes.
- d. To set forth a methodology for efficiently separating and collecting reusable and Recyclable Materials from the community's waste stream.
